## We can help.

We know that DNS requests can be intimidating and DNS support hard to find.

**ExchangeDefender** can help resolve DNS problems and configure advanced DNS projects on your choice of platforms.

### DNS Management

ExchangeDefender can manage your entire DNS lifecycle: transfers to a different DNS hosting platform, management of DNS records.

### DNS Projects

DNS projects such as DMARC, dynamic DNS address service, and reverse proxy configurations are all included.

### Reporting & Auditing

ExchangeDefender will monitor and audit for potential vulnerabilities
